

# PROGETTO LABORATORI LUDICO RICREATIVI

## INQUADRAMENTO STORICO

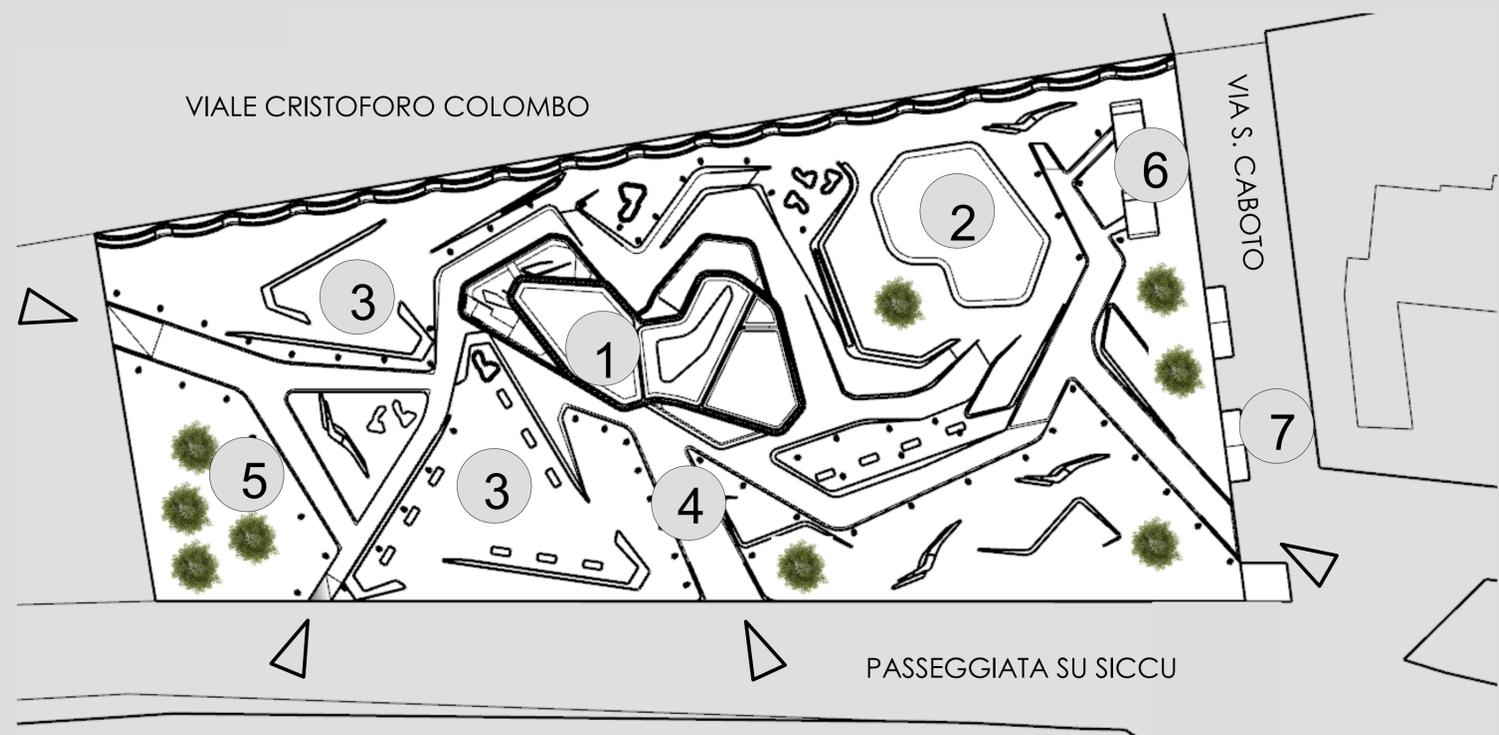

La località "Su Siccu", scelta per la realizzazione del progetto, era nel secolo scorso un posto malsano e paludoso bonificato nel 1919. E' una località di costa cagliaritano situata tra il molo Ichnusa ed il molo "pennello di Bonaria"; dalla sua passeggiata è possibile ammirare uno splendido scorcio del Golfo di Cagliari da una parte, ed il santuario di Bonaria con la sua imponente scalinata, dall'altra. Per molti anni la zona è rimasta in uno stato di abbandono.
